

## **WIRING HARNESS AND TOUCH SENSOR INCORPORATING SAME**

### **Abstract of the Disclosure**

A wiring harness and a touch sensor incorporating same are disclosed.

- 5    The touch sensor includes a sensing electrode disposed in a touch sensitive area.  
The touch sensor further includes a plurality of auxiliary electrodes disposed on a  
self-supporting dielectric substrate in a border area. The auxiliary electrodes  
transmit a touch signal to electronics configured to use the touch signal to  
determine the touch location.
